CORNAGLIA[®]
MOVING FROM TOMORROW

PROFILE

 ARKEMA DESIGN®, brand del gruppo Cornaglia, è da sempre legata al mondo della produzione nei vari settori: dall'arredamento, all'automotive, con l'obiettivo di essere sempre all'avanguardia per tecnologie - design - servizio al cliente – e costi competitivi.

Giancarlo Rusconi ha progettato e disegnato tutti i nostri prodotti, attento alle esigenze del mercato, già nel 1988 ha presentato quella che è conosciuta come la prima doccia a riscaldamento solare sul Mercato.

Negli ultimi dieci anni abbiamo rilanciato questo progetto, con vasto incremento della gamma.

Pensato per tutte le esigenze, grazie al design, alla qualità e al prezzo corretto ha avuto da subito un grande successo e una crescita esponenziale nelle vendite. Crediamo molto in questo accessorio utile a tutti e abbiamo fatto importanti investimenti sulla produzione e sui modelli, che ci consentono di affrontare preparati la richiesta del mercato.

Riteniamo che, non essendo ancora conosciuto dal grande pubblico, la sua costante crescita e divulgazione sarà naturale, confermato dai dati di questi ultimi anni. Molti sono gli innovativi progetti in cantiere dedicati alle docce, delle quali vantiamo già alcune copie, allargando la gamma agli arredi e al garden. Siamo inoltre in grado di offrire la realizzazione di prodotti personalizzati, con marchio dedicato.

ARKEMA DESIGN, la più vasta gamma di docce solari/tradizionali in pronta consegna, realizzata nei nostri stabilimenti di Villanova d'Asti (Torino), con tecnologie d'avanguardia, un riferimento produttivo per ottimizzare il vostro business.

Nel 2021, la casa madre Cornaglia Group, per favorirne l'ulteriore sviluppo, ha deciso di trasferire il brand ARKEMA DESIGN ad una divisione dedicata: PLART DESIGN.

 ARKEMA DESIGN®, a Cornaglia Group brand is ever since linked to the production world in different environments: from the furnishing to the automotive, with the aim of being always up to date for technologies-design-customer service and competitive costs.

Giancarlo Rusconi has projected and drawn all our products, focused on the needs of the Market, already in 1988 he has introduced the shower that nowadays is known as the first Solar Heated Shower on the Market.

During these last ten years, we have re-launched this project, with a great expansion of the range of products. Thought for all the needs, thanks to the design, to the quality and correct price, it has had from the beginning a great success and an exponential growth in sales.

We strongly believe in this useful accessory for everyone, we have made important investments on the production and on the models, which allows to find us ready to face the request of the market.

We consider that, as it is not yet known at the majority of the people, its constant growth and its diffusion will be natural, confirmed by the data of these last years. Many innovative projects dedicated to the showers are under development, of which we already boast some copies, enlarging the range to FURNISHING and GARDEN. In addition, we are able to offer the realization of personalized products, with dedicated mark.

ARKEMA DESIGN, the most great range of solar/traditional showers ready for delivery just in time, realized in our Plants in Villanova d'Asti (Turin - Italy), with forefront technologies, a production reference to optimize your business.

In 2021, in order to encourage further development, the parent company Cornaglia Group has decided to transfer ARKEMA DESIGN brand to a dedicated, specific division: PLART DESIGN.

PROFILE

 ARKEMA DESIGN®, brand du groupe Cornaglia est depuis toujours lié au monde de la production dans plusieurs secteurs : de l'ameublement à l'automotive, avec l'objectif d'être toujours à l'avant-garde pour les technologies- design-service au client- et couts compétitifs.

Giancarlo Rusconi, a projeté et dessiné tous nos produits, sensible aux exigences du Marché, déjà en 1988, il a introduit celle qui est connue comme la première douche à chauffage solaire sur le Marché. Pendant les dernières années nous avons relancé ce projet, avec un grand incrément de la gamme. Pensé pour tous les exigences, grâce au design, à la qualité et au prix correct qui a eu immédiatement un grand succès et une croissance exponentielle des ventes.

Nous croyons beaucoup dan cet accessoire utile à tous, nous avons fait des importants investissements sur la production et sur les modèles, qui nous permettent de faire face préparés à la demande du Marché.

Nous retenons que, n'étant pas connu par la plupart du public, sa constante croissance et divulgation sera naturelle, confirmé des données de ces dernières années. Les projets innovants dédiés aux douches en préparation sont beaucoup, des quels nous ventons déjà quelques copies, en augmentant la gamme aux ameublements et aux jardins. Nous sommes en plus, en mesure d'offrir la réalisation des produits personnalisés, avec marque dédié.

ARKEMA DESIGN, la plus vaste gamme de douches solaires/traditionnelles prête à livrer, réalisé dans nos usines à Villanova d'Asti (Turin- Italie), avec technologie d'avant-garde, un référence productif pour optimiser votre business.

En 2021, la maison mère Cornaglia Group, pour encourager son développement, a décidé de transférer la marque ARKEMA DESIGN vers une division dédiée: PLART DESIGN.

 ARKEMA DESIGN®, marca del grupo Cornaglia, siempre ha estado vinculado al mundo de la producción en los diversos sectores: desde el mobiliario hasta la automoción, con el objetivo de estar siempre a la vanguardia de las tecnologías: diseño, servicio al cliente y costos competitivos.

Giancarlo Rusconi ha concebido y diseñado todos nuestros productos, atento a las necesidades del mercado, ya en 1988 presentó lo que se conoce como la primera ducha calentada con energía solar en el mercado.

En los últimos diez años hemos relanzado este proyecto, con un gran aumento en el rango. Diseñado para todas las necesidades, gracias al diseño, la calidad y el precio correcto, ha tenido un gran éxito de inmediato y un crecimiento exponencial en las ventas.

Creemos mucho en este accesorio útil para todos, hemos hecho grandes inversiones en producción y modelos, que nos permiten enfrentarnos a la demanda del mercado.

Creemos que, dado que aún no es conocido por el público en general, su crecimiento y difusión constantes serán naturales, según confirman los datos de los últimos años.

Hay muchos proyectos innovadores en la tubería dedicada a las duchas, de los cuales ya tenemos algunas copias, ampliando la gama de muebles y el jardín. También podemos ofrecer la creación de productos personalizados, con marca dedicada.

ARKEMA DESIGN, la gama más amplia de duchas solares/tradicionales listas para su entrega, hechas en nuestras plantas de Villanova d'Asti (Turín - Italia), con tecnologías de vanguardia; una referencia productiva para optimizar su negocio.

En 2021, la empresa matriz Cornaglia Group, para fomentar un mayor desarrollo, decidió transferir la marca ARKEMA DESIGN a una división dedicada: PLART DESIGN.

ECONOMIA CIRCOLARE

Per recuperare la materia prima seconda dai prodotti di scarto la Cornaglia S.p.A ha acquistato un macinatore. La materia prima seconda viene poi inviata al centro ricerche che lo analizza e ne indica i migliori utilizzi.

CIRCULAR ECONOMY

In order to recover secondary raw material from waste products, Cornaglia S.p.A. has purchased a grinder. The secondary raw material is then sent to the research centre which analyses it and indicates the best uses for it.

RISPARMIO ENERGETICO

I 5 impianti fotovoltaici installati sui tetti degli stabilimenti producono annualmente circa 4 milioni di kWh di energia pulita evitando l'emissione di 1.600 tonnellate di CO2 ogni anno. Ulteriori aree di intervento interessano il recupero del vapore flash, l'introduzione di scambiatori di calore, la riconversione dei generatori, l'inserimento di compressori con inverter, la conversione ed illuminazione Led e la depurazione delle acque reflue.

ENERGY SAVING

The 5 photovoltaic systems installed on the roofs of the factories produce around 4 million kWh of clean energy annually, avoiding the emission of 1,600 tons of CO2 each year. Other areas of intervention concern the recovery of flash steam, the introduction of heat exchangers, the conversion of generators, the insertion of compressors with inverters, installation of LED lighting and the purification of waste water.

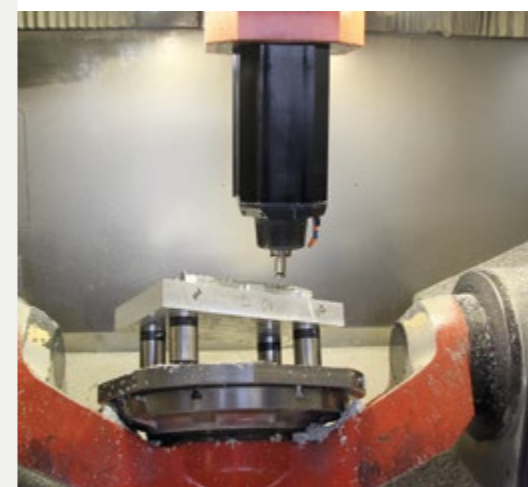

RICERCA E SVILUPPO

Il Centro Ricerche (riconosciuto dal Ministero dell'istruzione, dell'università e della ricerca) è una struttura moderna situata a Grugliasco. Vi lavorano circa 50 persone altamente specializzate, impiegate nella ricerca e nello sviluppo, nella realizzazione di prototipi e nella verifica sperimentale.

RESEARCH AND DEVELOPMENT

R&D Centre (recognised by the Ministry of Education, Universities and Research) is a modern facility located in Grugliasco. It employs around 50 highly specialised people in research and development, prototyping and experimental testing.

TECNOLOGIA/TECHNOLOGY:

- Taglio laser/Lasercut
- Pellicola/Wrapping
- Stampaggio alluminio/Aluminum moulding
- Soffiaggio tradizionale/ Traditional blowing
- Lavorazione e taglio ecologico di MDF/ Ecological MDF processing and cutting
- Stampaggio a iniezione/Injection moulding
- Stampaggio rotazionale/Rotational moulding
- Termoformatura/Thermoforming
- Soffiaggio 3D/3D Blowing

AVETE UN' IDEA MA NON SAPETE COME REALIZZARLA?

Noi siamo la soluzione. Con il nostro supporto viene esaminata la fattibilità del progetto. Tutti i dettagli vengono analizzati con cura con voi, per un risultato ottimale.

Possiamo realizzare ogni vostro progetto grazie alle molteplici tecnologie che possediamo.

- PROTOTIPAZIONE
- REALIZZAZIONE STAMPI
- SPECIALI TECNOLOGIE PER LA CURVATURA DEI PROFILI
- STAMPAGGIO TECNOLOGIA ROTOMOULDING, INIEZIONE E SOFFIAGGIO
- FONDERIA ALLUMINIO
- STAMPAGGIO METALLO A CALDO
- TORNITURA
- TRANSFER ROBOTIZZATO
- VERNICIATURA A POLVERE E A LIQUIDO

Tutti gli articoli presenti su questo listino possono essere realizzati con delle varianti su richiesta del Cliente da concordare con il nostro ufficio commerciale.

DO YOU HAVE AN IDEA, BUT YOU DO NOT KNOW HOW TO REALIZE IT?

We are the solution. With our support, the feasibility of the project is examined. All the details are analyzed with care with you, for an optimal result.

We can realize your project thanks to the multiple technologies that we have.

- PROTOTYPING
- MOLD PRODUCTION
- SPECIAL TECHNOLOGIES FOR PROFILES BENDING
- ROTOMOULDING TECHNOLOGY, BLOW MOLDING AND INJECTION
- ALUMINUM FOUNDRY
- FORGING
- LATHING
- ROBOT TRANSFER
- POWDER AND LIQUID COATING

All the articles present on this price list can be made with variants on Customer request be agreed with our commercial office.

VOUS AVEZ UNE IDÉE, MAIS VOUS NE SAVEZ PAS COMMENT LA RÉALISER?

Nous sommes la solution. Avec notre soutien, on examine la faisabilité du projet. Tous les détails sont analysés avec soin avec vous, pour un résultat optimal. Nous pouvons réaliser votre projet grâce aux multiples technologies que nous avons.

- PROTOTYPAGE
- RÉALISATION DE MOULES
- TECHNOLOGIES SPÉCIALES CINTRAGE DES PROFILES EN ALUMINIUM
- ROTOMOULDAGE, INJECTION ET SOUFFLAGE
- FONDERIE D'ALUMINIUM
- IMPRESSION À CHAUD DE MÉTAUX
- CHARIOTAGE
- TRANSFERT ROBOTISÉ
- PEINTURE EN POUDRE ET LIQUIDE

Tous les articles de cette liste de prix peuvent être FABRIQUÉS avec des variantes à la demande du Client accepté du côté de notre bureau commercial.

TIENES UNA IDEA, ¿PERO NO SABES CÓMO REALIZARLA?

Somos la solución. Con nuestro apoyo, examinamos la facilitación del proyecto. Todos los detalles se detendrán con usted, para un resultado óptimo.

Podemos realizar su proyecto gracias a las múltiples tecnologías que tenemos.

- CREACION DE PROTOTIPOS
- PRODUCCION DE MOLDES
- TECNOLOGÍAS ESPECIALES PARA CURVATURA DE PERFILES
- TECNOLOGIA DE MOLDES ROTACIONAL, SOPLADORAS Y INYECTORAS
- FUNDICION DE ALUMINIO
- IMPRESION DE METALES EN CALIENTE
- TORNERIA
- TRANSFERENCIA ROBOTIZADA
- PINTURA EN POLVO Y EN LIQUIDA

Todos los artículos en esta lista de precios se puedan hacer con variantes a petición del cliente a convenir con nuestra oficina comercial.

SUSTAINABLE CIRCULAR ECONOMY PROJECT

Il progetto ricicli-AMO® ha la finalità di favorire con processi e atti concreti una netta sensibilizzazione rispetto ai processi di economia circolare. Ci poniamo l'obiettivo di coinvolgere sempre più la comunità imprenditoriale, divulgando i temi legati alla sostenibilità ambientale, economica e sociale, nella certezza che "la genialità" che nasce dall'incontro e dalla condivisione, possa gettare le basi per creare nuovi modelli di vita e di consumo.

Dal 2020 Plart Design ha deciso di utilizzare per i suoi processi produttivi materiale riciclabile o riciclato. A tal proposito un importante accordo è stato siglato con L'Oréal Saipo Industriale per rigenerare materiali plastici fine vita utilizzati al fine di dare una seconda vita alla plastica producendo nuovi mezzi di raccolta da reintrodurre nello stabilimento.

The ricicli-AMO® project has the purpose of favoring a net result with concrete processes and acts raising awareness of circular economy processes. We set ourselves the goal of involve the business community more and more, disseminating issues related to sustainability environmental, economic and social, in the certainty that "the genius" that arises from the encounter is from sharing, can lay the foundations to create new models of life and consumption.

From 2020 Plart Design has decided to use recyclable material for its production processes or recycled. In this regard, an important agreement was signed with L'Oréal Saipo Industriale to regenerate end-of-life plastic materials used in order to give plastic a second life by producing new collection means to be reintroduced into the plant.

Le projet ricicli-AMO® a pour objectif de favoriser un résultat net avec des processus et des actes concrets sensibilisation aux processus d'économie circulaire. Nous nous sommes fixés l'objectif de impliquer de plus en plus le monde des affaires, en diffusant les questions liées à la durabilité environnemental, économique et social, dans la certitude que « le génie » qui naît de la rencontre est du partage, peut poser les bases pour créer de nouveaux modèles de vie et de consommation.

A partir de 2020, Plart Design a décidé d'utiliser des matériaux recyclables pour ses processus de production ou recyclé. A ce titre, un accord important a été signé avec L'Oréal Saipo Industriale pour régénérer les matières plastiques en fin de vie utilisées afin de donner une seconde vie au plastique en produisant de nouveaux moyens de collecte à réintroduire dans l'usine.

El proyecto ricicli-AMO® tiene como finalidad favorecer un resultado neto con procesos y actos concretos Sensibilización sobre los procesos de economía circular. Nos fijamos el objetivo de involucrar cada vez más a la comunidad empresarial, difundiendo temas relacionados con la sostenibilidad. Ambiental, económica y social, en la certeza de que "el genio" que surge del encuentro es de compartir, puede sentar las bases para crear nuevos modelos de vida y consumo.

Desde 2020 Plart Design ha decidido utilizar material reciclable para sus procesos productivos o reciclado. En este sentido, se firmó un importante acuerdo con L'Oréal Saipo Industriale para regenerar los materiales plásticos al final de su vida útil utilizados para darle una segunda vida al plástico mediante la producción de nuevos medios de recolección para ser reintroducidos en la planta.

SUSTAINABLE CIRCULAR ECONOMY PROJECT

GREEN PRODUCT

 *Il sole é la nostra fonte di ispirazione per realizzare prodotti di esclusivo design. Arkema Design sostenibili per natura.*

 *The sun is our source of inspiration to create exclusive design products. Arkema Design sustainable by nature.*

 *Le soleil est notre source d'inspiration pour créer des produits design exclusifs. Arkema Design durable par nature.*

 *El sol es nuestra fuente de inspiración para crear productos de diseño exclusivos. Arkema Design sostenible por naturaleza.*

SUSTAINABLE CIRCULAR ECONOMY PROJECT

 In questo momento è fondamentale pensare in termini di Green Economy seguendo un modello di sviluppo sostenibile che tenga conto dell'impatto ambientale derivante dal progresso industriale. L'obiettivo è il modello di economia circolare, un modello di sviluppo scelto nel 2015 dalla Commissione Europea a seguito del World Economic Forum di Davos nel 2014.

La Vision di ARKEMA, azienda impegnata nel riciclo della plastica, individua nella sostenibilità la prospettiva e il futuro del mercato della plastica.

Attraverso attività di innovazione e ricerca e sviluppo, ARKEMA ha sviluppato prodotti in polvere dedicati allo stampaggio rotazionale, una vera innovazione per la produzione di beni durevoli in un'ottica di sostenibilità.

Vogliamo coinvolgere sempre di più la business community, divulgando temi legati all'ambiente, all'economia e alla sostenibilità sociale, nella certezza che "il genio" che nasce dall'incontro e dalla condivisione, possa porre le basi per creare nuovi modelli di vita e di consumo .

Nel mondo di oggi, fare affari non significa solo fare affari generare profitti. Le aziende si stanno rendendo conto che la Mission deve saper andare oltre il core business, assumendosi la responsabilità sociale e ambientale delle proprie scelte.

 In this moment it is essential to think in terms of the Green Economy following a sustainable development model that takes into account the environmental impact resulting from industrial progress. The goal is the circular economy model, a development model chosen in 2015 by the European Commission following the World Economic Forum in Davos in 2014.

The Vision of ARKEMA, a company committed in the recycling of plastic, identifies the prospect and future of the plastic market and its sustainability.

Through innovation and R&D activities, ARKEMA developed powder products dedicated to rotational molding, a true innovation for the production of durable goods with a view of sustainability.

We want to involve the business community more and more, disseminating issues related to environmental, economic and sustainability social, in the certainty that "the genius" that arises from the encounter and sharing, can lay the foundations for creating new models of life and consumption.

In today's world, doing business is not just about generating profits. Companies are realizing that the Mission must know how to go beyond the core business, making social and environmental responsibility their choice.

CONFEZIONE

IMBALLAGGIO FAMIGLIA

Tutti gli imballaggi sono stati progettati seguendo un unico linea grafica, in modo da risultare visivamente il più possibile uniformi.

IMBALLAGGIO ECOLOGICO

L'imballo è tutto in cartone vulcanico, riutilizzabile più volte e riciclabile al 100%.

ESPORTAZIONE CERTIFICATA

tutte le confezioni sono certificate e conformi alle normative europee normative sull'esportazione, al fine di garantire la massima sicurezza nel settore dei trasporti.

PACKAGING

PACKAGING

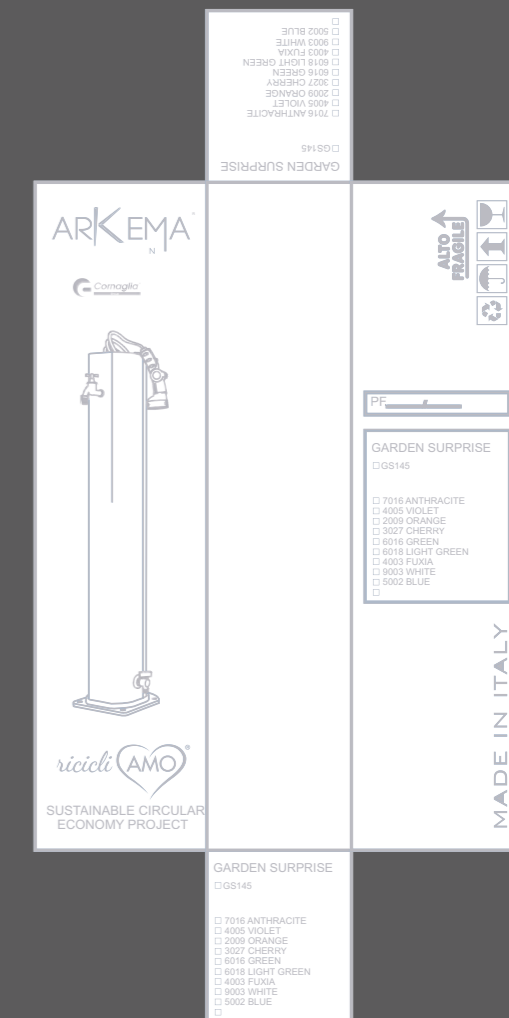

All packaging has been designed following a single graphic line, so as to be as visually uniform as possible.

ECOLOGICAL PACKAGING

The packaging is all made of volcanic cardboard, reusable several times and 100% recyclable.

EXPORT CERTIFIED

all packages are certified and comply with European export regulations, in order to guarantee maximum safety in the field of transport.

hot ball[®]

sun kept[®]

Quale scegliere?

Hot Ball

Hot Ball serie 2.00 è un collettore solare dal design innovativo, facile da installare e trasportare, che grazie alla sua forma riesce a sfruttare al massimo l'irradiazione solare.

Realizzata in polietilene termoisolante resistente al calcare e alle correnti galvaniche acide.

L'innovativa struttura la rende praticamente indistruttibile e quindi adatta all'utilizzo in condizioni di emergenza (es. protezione civile etc).

- HB 200 per docce, lavandini o erogatori predisposti con miscelazione calda e fredda
- HB 240 con miscelatore per docce, lavandini o erogatori senza miscelatore calda fredda
- HB 270 con miscelatore termostatico per docce, lavandini o erogatori dove si desidera una temperatura programmata.

La versione Hybrid /80 è una soluzione unica sul mercato per uso professionale, in quanto è in grado di garantire acqua calda in ogni condizione climatica.

Accessorio utile a tutti coloro che per lavoro o svago vivono gli spazi esterni.

Sun Kept

Sun Kept serie 1.00 è un progetto innovativo di design che fa dell'efficienza il suo punto di forza.

Il suo design originale lo rende un elemento d'arredo outdoor, studiato per resistere a qualsiasi evento atmosferico o accidentale.

Il suo maggior utilizzo è rivolto al riscaldamento di piscine e contenitori di acqua interni ed esterni, a differenza dell'Hot Ball non lavora a pressione e pertanto deve essere utilizzata sulla linea di filtraggio a valle della pompa e del filtro.

Which hotball to choose?

Hot Ball

Hot Ball 2.00 series is a solar collector with innovative design, easy to install and transport, thanks to its shape it's able to exploit the maximum solar radiation.

Made of special thermosetting resins resistant to limestone and acid galvanic currents. The innovative structure makes it practically indestructible and therefore suitable for use in emergency conditions (eg civil protection, etc.).

- HB 200 for showers, sinks or dispensers prepared with hot and cold mixing
- HB 240 with mixer for showers, sinks or dispensers without hot / cold mixer
- HB 270 with thermostatic mixer for showers, sinks or dispensers where a programmed temperature is desired.

The Hybrid / 80 version is able to guarantee hot water in all climatic conditions, it represents a unique solution for professional use.

Useful for all those who live outdoor spaces for work or leisure.

Sun Kept

Sun Kept 1.00 series is an innovative design project that makes efficiency its strong point.

Its original design makes it an outdoor furnishing, designed to withstand any atmospheric or accidental event.

Its main use is heating swimming pools and internal and external water containers, unlike the Hot ball it does not work under pressure and therefore must be used on the filtering line downstream of the pump and filter.

Innovative solar collector

future of solar shower

 Nella filosofia di Arkema e Jean Rusconi, tutti i prodotti sono studiati e realizzati per offrire vantaggi all'utilizzatore, senza alcuna controindicazione. Viene prestata grande attenzione al design, alla semplicità d'utilizzo e all'innovazione. La linea Collettori raggiunge il massimo di questi obiettivi differenziandosi dagli innumerevoli prodotti esistenti. Solar collector 2.0 rappresenta l'apice di questa filosofia, che consente un risparmio energetico e idrico, eliminando i limiti delle docce a riscaldamento solare e tradizionale, dovuti principalmente al colore, posizionamento, distanza dalla fonte di calore, generando acqua riscaldata dal sole per qualsiasi utilizzo.
SEMPLICITA' DI UTILIZZO E DI MONTAGGIO
Posizionato al sole, un collettore solare non necessita di alcun accorgimento. E' facilmente trasportabile; il collegamento dei tubi non necessita di installatori professionisti; è modulabile all'infinito permettendo di ottenere grandi quantità di acqua calda.
La differenza sostanziale dagli altri prodotti, è la resistenza al calcare, agli urti, alle cadute e a qualsiasi evento atmosferico, anche estremo, rendendolo un prodotto unico insuperabile anche nella versione hybrida.

 In the philosophy of Arkema and Jean Rusconi, all products are designed and manufactured to offer benefits to the user, without any contraindications. Great attention is paid to design, ease of use and innovation. The manifold line achieves the maximum of these objectives by differentiating itself from the countless existing products. Solar Collector 2.0 represents the pinnacle of this philosophy, which allows energy and water savings, eliminating the limits of solar and traditional heated showers, mainly due to the color, positioning, distance from the heat source, generating water heated by the sun for any use.
SIMPLICITY OF USE AND ASSEMBLY
Positioned in the sun, a solar collector does not require any precautions. It is easily transportable; the connection of the pipes does not require professional installers; it can be modulated infinitely, allowing you to obtain large quantities of hot water.
The main difference from the other products is the resistance to limestone, to impacts, to falls and to any atmospheric event, even extreme, making it a unique product that cannot be beaten even in the hybrida version.

 Dans la philosophie d'Arkema et de Jean Rusconi, tous les produits sont conçus et fabriqués pour offrir des avantages à l'utilisateur, sans aucune contre-indication. Une grande attention est accordée au design, à la facilité d'utilisation et à l'innovation.
La ligne Collecteur atteint le maximum de ces objectifs en se différenciant des innombrables produits existants.
Le capteur solaire 2.0 représente le summum de cette philosophie, qui permet des économies d'énergie et d'eau, éliminant les limites des douches à chauffage solaires et traditionnelles, principalement en raison de la couleur, du positionnement, de la distance de la source de chaleur, générant de l'eau chauffée par le soleil pour toute utilisation.
SIMPLICITÉ D'UTILISATION ET DE MONTAGE
Positionné au soleil, un capteur solaire ne nécessite aucune précaution, il est facilement transportable ; le raccordement des tuyaux ne nécessite pas d'installateurs professionnels; il peut être modulé à l'infini, vous permettant d'obtenir de grandes quantités d'eau chaude.
La principale différence avec les autres produits est la résistance au calcaire, aux chocs, aux chutes et à tout événement atmosphérique, même extrême, ce qui en fait un produit unique et inégalé même dans la version hybrida.

 En la filosofía de Arkema y Jean Rusconi, todos los productos están diseñados y fabricados para ofrecer beneficios al usuario, sin contraindicaciones. Se presta gran atención al diseño, la facilidad de uso y la innovación.
La línea de Colectores logra el máximo de estos objetivos diferenciándose de los innumerables productos existentes.
El colector solar 2.0 representa la cúspide de esta filosofía, que permite ahorrar energía y agua, eliminando los límites de las duchas solares y tradicionales calentadas, principalmente por el color, posicionamiento, distancia de la fuente de calor, generando agua calentada por el sol para cualquier uso.
SIMPLICIDAD DE USO Y MONTAJE
Colocado al sol, un colector solar no requiere precauciones, es fácilmente transportable; la conexión de las tuberías no requiere instaladores profesionales; se puede modular infinitamente, lo que le permite obtener grandes cantidades de agua caliente.
La principal diferencia con el resto de productos es la resistencia a la piedra caliza, a los impactos, a las caídas y a cualquier evento atmosférico, incluso extremo, lo que lo convierte en un producto único e insuperable incluso en la versión híbrida.

SERENDIPITY® CHAISE

🇮🇹 Chaise Longue in polietilene dalla superficie in effetto stone che le dà un valore aggiunto. Le imperfezioni sono volute per conferire all' oggetto un effetto stone più naturale, con il vantaggio che utilizzandola non si ha l' effetto ventosa, grazie a una micro circolazione dell' aria data dall' effetto della superficie. La sua forma ergonomica e' perfetta per i momenti di relax. La scocca e' volutamente morbida e flessibile, per rendere confortevole il suo utilizzo anche senza l'uso di un telo. Resistente agli UV - alla salsedine- all'umidità'

🇬🇧 Chaise Longue in polyethylene with stone effect surface that gives additional value. The imperfections are made on purpose, to give to this object a more natural stone effect, with the advantage that using there is any suction effect, thanks to a micro circulation of the air given by the surface effect. Its shape is ergonomic, and it is perfect for relax moments. The body is on purpose soft and flexible, to make its use comfortable even without any towel. Resistant to UV rays- saltiness- humidity

🇫🇷 Chaise Longue en polyéthylène avec son surface en effet pierre qui lui donne une valeur additionnelle. Les imperfections sont voulues pour conférer à cet objet un effet pierre plus naturel, avec l' avantage que en l' utilisant vous n'avez pas l' effet d'aspiration, grâce à une microcirculation de l'air donnée de l'effet de la surface. Sa forme ergonomique est parfaite pour les moments de relax. La surface est volontairement souple et flexible, pour rendre son utilise très confortable, même sans utiliser une serviette. Résistante aux rayons UV, à la salinité et à l'humidité.

🇪🇸 Chaise Longue en polietileno de la superficie en efecto piedra que le aporta valor añadido. Las imperfecciones son intencionales para otorgar all' objeto un efecto piedra más natural, con el ventaja que utilizando no se la tiene l' efecto ventosa, gracias a una micro circulación dell' aire fecha dall' efecto de la superficie. Su forma ergonómica y' perfecta por los momentos de relajamiento. El bastidor y' intencionalmente blanda y flexible, para hacer confortable su empleo también sin el empleo de un paño. Resistente a los rayos UV, a la salinidad - a la humedad'
