

AIR HURRICANE ROSSO

OUTRIDE-AIR-HURRICANE-ROSSO / 8052789398337

Specifications

Highly robust, it has been made with a double layer of PVC, increasing its stability in water and reducing the likelihood of puncture. In addition, the use of glue has been eliminated by means of heat-sealing. The result is a super strong and lightweight SUP.

It has a double outer chamber and a second chamber along the vertical axis, all to reduce the possibility of punctures and ensure maximum safety and rigidity.

Technical characteristics:

Rigid, robust, lightweight and safe

Dimensions: 305x82,5x15 cm

Volume: 240 L

Weight: 10.5 Kg

Capacity: 135 Kg

(Maximum capacity refers to begin women can easily exceed this value)

SUP SIDNEY 11

OUTRIDE-SUP-SIDNEY-11 / 8056585531738

Specifications

To never compromise on stability and lightness, the SIDNEY is the right choice. The elastic cargo strap is perfect for safely storing a backpack or other items. The dropstitch guarantees the board's great rigidity once inflated. The single layer of PVC allows incredible lightness. The handle is reinforced so that it can resist wear and tear for a long time. The EVA crocs with which the upper part is lined provides an effective anti-slip action without being uncomfortable underfoot. The raised kickpad provides an essential foothold in the surf.

Great volume and great lightness! The Air Sidney is our best board for those who demand stability but would never give up practicality and lightness. The pad's exotic-inspired pattern and colours will accompany your next adventures in the sea, lake or river.

AIR GATOR

OUTRIDE-AIR-GATOR / 8052789398344

Specifications

Born as an aid in the world of rescue, because of its stability, the inflatable SUP model AIR GATOR, offers maximum safety even for beginners with its double chamber. It is very close to the feeling of the rigid boards with the second central chamber. This SUP provides great performance, high buoyancy and safety.

Safety ensured by the double chamber which guarantees the return to the ground in case of punctures, and rigidity thanks to the positioning, along the vertical axis, of a second chamber.

Technical characteristics:

Rigid, sturdy and safe

Dimensions: 335x82.5x15 cm

Volume: 240 L

Weight: 11.5 Kg

Capacity: 150 Kg (Maximum capacity refers to beginners, advanced athletes can easily exceed the described value.)

Fin included: US 9"

Pipe included
